TRUCK AND BUS TIRES

GH 100

GH 100 pattern is suitable to use on all axles on buses and at steer or non-powered second axle on trucks. Tread pattern geometry is optimized to deliver steering and grip on wet roads. Exceptional carcass structure provides outstanding braking performance.

LONG HAUL

EU LABEL

Average values from all sizes of this specific model.

PATTERN PROPERTIES

- Computer designed tire profile and block arrays offer safe and balanced driving.

- Optimised tread design provides resistance against irregular wear by balancing the pressure equally under load.

- Special tread compound and robust structure ensure longevity and economic fuel consumption.

- Excellent carcass structure is suitable for retreading several times.

- Offers excellent grip and short braking distance with numerous sipes and z-shaped circumferential blocks.

- Circumferential grooves discharge water quickly and efficiently.

POSITION / APPLICATION

GH 105

GH 105 is a steer pattern that is designed for trucks. It provides comfort and maneuverability for a balanced drive on asphalt roads. It can also be used on the non-powered second axle on trucks. Wide tread area and multi dimensional sipes improve mileage and enhance traction. Offers outstanding grip on both wet and dry roads.

TYRE SIZE/LOAD/SPEED INDEX

11 R22.5 148/145M

12 R22.5 152/148M

PATTERN PROPERTIES

- Wide shoulder blocks provide lateral balance for a smooth drive.

- Circumferential grooves drain water quickly and efficiently.

- Indented sides of the blocks provide safe brake distance even if the tire is worn.

- Optimized tread design provides resistance against irregular wear by balancing the pressure equally under load.

- Special tread compound and robust structure ensure longevity and economic fuel consumption.

- Medium density sipes provide superior handling and decrease braking distance.

- Excellent carcass structure is suitable for retreading several times.

POSITION / APPLICATION

GH 110 ECOPLANET

GH 110 Ecoplanet is suitable to use on all axles on buses and at steer or non-powered second axle on trucks. Special tread pattern design ensures even wear throughout the tyre's lifespan. Multiple grooves allow fast water discharge and provide exceptional wet handling on asphalt roads. Wide tread area and multi dimensional sipes improve mileage and enhance traction. Offers outstanding grip on both wet and dry roads.

PATTERN PROPERTIES

- Optimized tread pattern improves resistance against irregular abrasion by distributing pressure equally under load.

- Numerous sipes on the ribs enable exceptional grip.

- Circumferential grooves provide quick and efficient water discharge.

- Computer designed tire pattern and five circumferential ribs ensure a balanced and comfortable drive.

- Special tread compound and robust structure enhance efficiency of fuel consumption and improves longevity.

- Exceptional carcass structure is suitable for retreading.

POSITION / APPLICATION

DH 100

DH 100 is a drive axle pattern designed for busses and trucks. Provides exceptional traction on asphalt roads. Block array decreases wear and increases wet grip. Optimized tread profile provides resistance against irregular wear under heavy loads. Delivers a safe drive and extended mileage in demanding winter conditions. Suitable for retreading.

EU LABEL

Average values from all sizes of this specific model.

PATTERN PROPERTIES

- Optimized tread design provides resistance against irregular wear by distributing the pressure equally under load.

- Reinforced interconnected blocks and carefully arranged block array improve driving balance.

- Circumferential and lateral grooves drain water quickly and efficiently.

- Block array structure provides high traction by generating wide tire contact patch on asphalt in any kind of weather conditions.

- Special tread compound and robust structure ensure longevity and enhance fuel efficiency.

- Excellent carcass structure is suitable for retreading.

- Optimized tread depth increases the tire's lifespan.

POSITION / APPLICATION

GZ 300

GZ 300 pattern is designed for light commercial vehicles and suitable to use on all axles. Strong carcass structure provides high retreadability feature. Delivers balanced drive, perfect comfort and high maneuverability on asphalt roads. Provides exceptional wet grip. The unique pattern design enhances mileage performance.

TYRE SIZE

LOAD/SPEED INDEX

8.5	R17.5	121/120L

265/70	R17.5	140/138M

EU LABEL

Average values from all sizes of this specific model.

PATTERN PROPERTIES

- Unique pattern design and optimized block array provides excellent steering performance.

- Horizontal sipes between circumferential blocks increase traction, decrease braking distance and provide outstanding grip on wet roads.

- Z-shaped block structure provides excellent traction and secure braking performance.

- Stone rejecters inside the grooves prevent pebble penetration inside grooves, protecting the tread and carcass.

- Circumferential grooves drain water quickly and efficiently.

- Provides long life and resistance to irregular wear thanks to its special belt construction, optimized footprint and rigid shoulders.

- All steel construction and specifically designed low profile structure meet all highway usage criteria and offer superior comfort.

POSITION / APPLICATION

DZ 300

DZ 300 is drive axle (traction) pattern designed for light commercial trucks and busses. Having 3PMSF and M+S, DZ 300 provides exceptional grip and braking on snowy roads. Delivers high mileage thanks to its special compound.

EU LABEL

Average values from all sizes of this specific model.

PATTERN PROPERTIES

- Strong circumferential ribs provide maximum resistance against cuts and chips.

- Wide channels located on the shoulders improve traction on harsh working conditions including muddy roads.

- Zigzag block structure ensures perfect grip and safe braking performance.

- Stone ejectors located on groove bases avoid pebble penetration and saves the carcass.

- Optimized tread profile evenly distributes weight on the footprint to guarantee long service life by avoiding irregular wear.

- Special tread compound provides durability for off-road operations and offers comfort and low rolling resistance for highway use.

- Steel belted carcass is strong enough to be retreaded several times to multiply the tire's service life.

POSITION / APPLICATION

DC 700 Plus

DC 700 Plus is a drive axle pattern suitable for mixed service. Its special tread compound provides resistance to tears. Delivers high mileage and comfort on asphalt roads. The directional tread design offers exceptional traction along with effective soil discharge and drainage.

MIXED SERVICE

315/80	R22.5	156/150K (154/150L)

EU LABEL

Average values from all sizes of this specific model.

PATTERN PROPERTIES

- Stone ejectors located deep of grooves decrease stone trapping.

- While reinforced interconnected blocks provide a comfortable drive on motorway it also increases block durability in construction site conditions.

- The directional, block-type tread pattern offers excellent grip and traction on wet, muddy and snowy roads in construction sites, while performing balanced performance on asphalt.

- The sipes between circumferential blocks increase traction on snowy and muddy roads, and provide short braking distance

- Block array with different block sizes improves comfort by minimizing noise.

- Optimized groove design enables excellent water/ mud/snow discharge.

POSITION / APPLICATION

GY 800

Closed structure and pattern compound are specifically engineered for construction and mining site conditions to offer long life and ultimate wear and cut resistance. Provides excellent grip and handling on tough or muddy roads.

Average values from all sizes of this specific model.

PATTERN PROPERTIES

- Optimized tread pattern consisting of wide channels and big blocks provides superior handling and longevity on wet on muddy roads.

- Reinforced interconnected blocks provide a balanced and comfortable drive while enhancing resistance towards tough site conditions.

- Optimized grooves drain water, mud and snow quickly and effectively.

- Unique tread design improves resistance against irregular wear by distributing pressure equally under load.

- Special tread compound provides resistance to wears, cuts and breaks.

- Strong carcass structure is suitable for retreading multiple times.

POSITION / APPLICATION

DM 905

M+S

DM 905 is an all position pattern that is suitable for off operating service. Robust tread blocks provide exceptional resistance to tears and offer outstanding traction in tough road conditions. Offers excellent self cleaning feature thanks to its special lug design.

TYRE SIZE

LOAD/SPEED INDEX

13 R22.5

156/150K

PATTERN PROPERTIES

- Reinforced block arrays provide steady driving performance at off road conditions.

- Interconnected reinforced blocks enhance driving balance and offer resistance to chunks.

- Open angled grooves drain mud quickly and eject stones effectively.

- Provides high mileage along with steady off the road driving through optimized tread profile, full/empty rate and tread depth.

- Exclusive compound provides endurance against wear-out, cuts, splits and laceration.

- Durable carcass structure allows retreading.

POSITION / APPLICATION

GU 500

GU 500 is an all season bus tire that is suitable for all positions. Robust compound provides exceptional service for inner-city narrow streets and curbs with stop-and-go traffic. Delivers exceptional mileage performance. Offers high retreadability feature thanks to its strong carcass structure.

TYRE SIZE

LOAD/SPEED INDEX

275/70 R22.5 150/148J

EU LABEL

Average values from all sizes of this specific model.

PATTERN PROPERTIES

- Specially developed tread composition and four wide circumferential ribs separated with sipes provide ultimate performance and longevity in inner-city usage.

- Z-shaped channels and thin sipes provide safety and traction on wet roads.

- Circumferential grooves drain water quickly and efficiently.

- Optimized tread width and tread depth ensures longevity and resistance to abrasion.

- Different size block array reduces tread noise level.

- Friction indicators located on sidewalls enable controlling the levels of abrasion.

- Reinforced sidewalls provide resistance against the impacts of friction to pavement while approaching bus stops.

- Special tread composition offers high traction and safety under low temperatures.

POSITION / APPLICATION

GUW 550

GUW 550 is suitable to be used as all position tire on innercity vehicles. Robust compound provides exceptional service for innercity narrow streets and stop-and-go traffic. Offers high retreadability thanks to its strong carcass structure. 3PMSF and M+S markings on the tire ensure better grip and braking on snow. Wide tread design enhances mileage of the tire.

TYRE SIZE

LOAD/SPEED INDEX

275/70 R22.5 150/14J (152/148E)

EU LABEL

Average values from all sizes of this specific model.

PATTERN PROPERTIES

- Five circumferential ribs provide safety, balanced driving and lateral resistance.

- Z-shaped capillary sipes offer ultimate traction on snowy roads and improves safety by reducing brake distance.

- Ensures effective water, mud and snow discharge thanks to four circumferential grooves.

- Optimized block array reduces tread noise level.

- Specially formulated tread composition and deep blocks provide ultimate performance and longevity by increasing resistance against abrasion caused by frequent stops.

- Friction indicators located on sidewalls enable controlling the levels of abrasion.

- Reinforced sidewalls provide resistance against the impacts of friction to pavement while approaching bus stops.

- Special tread composition offers high traction and safety under low temperatures.

- Optimized tread width and tread depth enhance longevity by improving resistance against abrasion.

POSITION / APPLICATION

DUW 550

DUW 550 is designed for innercity vehicles especially as drive axle of buses. 3PMSF and M+S markings on the tire prove better grip and braking on winter conditions. Wide tread design enhances mileage performance of the tire.

TYRE SIZE

LOAD/SPEED INDEX

275/70 R22.5 150/145J (152/148E)

275/70 R22.5 152/148J

- Five circumferential ribs provide safety, balanced driving and lateral resistance.

- Friction indicators located on sidewalls enable controlling the levels of abrasion.

- Reinforced sidewalls provide resistance against the impacts of friction to pavement while approaching bus stops.

- Reinforced interconnected blocks offer ultimate inner city performance.

POSITION / APPLICATION

DU 500

It is a drive axle city bus tire developed for use at low temperatures, on dry, wet and snowy surfaces. It can also be used on the front axle depending on the weather and road conditions.

TYRE SIZE

LOAD/SPEED INDEX

275/70 R22.5 150/145J (152/148E)

EU LABEL

Average values from all sizes of this specific model.

PATTERN PROPERTIES

- The specially developed tread compound provides the traction needed in winter conditions, on snowy and wet surfaces, with four wide circumferential ribs divided by a wide groove and then lamellas. It offers short braking distance.

- Thin lamellas placed on the pattern with zigzag channels serve as holding elements. Provides traction and safety on snowy and wet surfaces.

- It provides effective water/mud/snow discharge with three circumferential grooves. It minimizes the settling of stones in the channels with the stone pushers at the bottom of the grooves.

POSITION / APPLICATION

• In severe winter conditions, the tire can be fitted to the front axle depending on road conditions.

DH COACH

It is a drive axle bus tire developed to provide balanced driving, excellent grip, and safety on asphalt. It offers low rolling resistance for fuel efficiency and long mileage, ensures safety in all seasons, and delivers superior braking and traction on snow.

TYRE SIZE

LOAD/SPEED INDEX

295/80 R22.5

154/150 M

EU LABEL

Average values from all sizes of this specific model.

PATTERN PROPERTIES

- Provides balanced and comfortable driving with an optimized tread pattern and specially designed block arrangement. Offers low noise levels.

- The blocks, separated by thin sipes, limits the movement of the blocks during traction and ensures even wear. It also offers low rolling resistance.

- Provides high traction with high-density sipes placed on the blocks. It offers superior grip and safety in all seasons.

- Provides high traction with high-density sipes placed on the blocks. It offers superior grip and safety in all seasons.

POSITION / APPLICATION

GH COACH

It is an all-axle bus tire developed to provide balanced driving, excellent comfort, and safety on asphalt. It offers low rolling resistance for fuel efficiency and long mileage, ensures safety in all-season use, and provides superior braking and traction on snow.
