HIGH PERFORMANCE TIRES

W810 ICEGRIPPER

TECHNICAL HIGHLIGHTS

Wide lateral grooves and circumferential blocks improve braking performance on snow and ice.

Z-shaped multi sipes deliver extremely stable and balanced driving experience.

Computer designed block array features minimum road / pattern noise and delivers driving comfort.

Depending on the size, 3 or 4 circumferential wide grooves provide excellent water drainage and effective prevention against aquaplaning and slush planning.

TECHNOLOGY & BENEFITS

EXCEPTIONAL BRAKE PERFORMANCE

Full silica tread compound remains flexible even at very low temperatures and delivers exceptional braking and handling on snow-covered roads.

HANDLING

High tech cap ply construction improves uniformity for a smoother ride and enhances durability and resistance against tread wear.

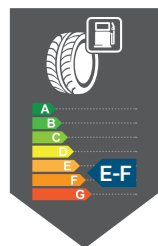

CORNERING PERFORMANCE

Jointless mono strand bead wire and hard bead filler improve lateral stability in high speed cornering.
