(This tire can carry 7300 kg load at the speed of 50 km/h.)

# Stx ND31 (R-4)

Stx ND31 (R-4) tire has strong radial casing and steel belted construction. It is developed for construction equipment to be used in the areas of agriculture and construction. The directional tread pattern provides excellent traction, longevity, resistance to damage and high carrying capacity. Stx ND31 (R-4) is the right response to agro-industrial heavy-duty needs. It is suitable for all digging and loading operations on vehicles such as telehandlers, compact loaders and backhoe loaders.

# Stx ND33 (R-4)

Stx ND33 (R-4) is developed and designed to offer perfect traction and long life for compact industrial vehicles such as compact loaders, backhoe loaders and telehandlers. Deep and wide lugs are carefully located on the tread to ensure perfect traction on hard or soft terrains. The wide tread profile provides a balanced feel on every condition and increases the tire's service life by avoiding irregular wear. Reinforced sidewalls offer maximum resistance against cuts and puncture while the steel belts under the tread improve the tire's durability and load capacity.

# Stx RD22 (G-2)

Stx RD22 (G-2) is an all steel radial tire that promises resistance to tears and wears in worksites and on challenging roads. Specially formulated tread compound and all steel carcass structure of Stx RD22 (G-2) offer longevity. The non-directional pattern design delivers outstanding traction and grip in demanding conditions.

Stx RD22 (G-2) is designed especially for grader applications.

# Stx RD22 (L2/E2)

Stx RD22 (L2/E2) is an all steel radial tire that promises resistance to tears and wears in worksites and on challenging roads. Specially formulated tread compound and all steel carcass structure of Stx RD22 (L2/E2) offer longevity. The non-directional pattern design delivers outstanding traction and grip in demanding conditions. Stx RD22 (L2/E2) is designed especially for grader applications.

# SOLIDMAX N (SOLID)

SOLID ST is developed to offer extended service life and minimized maintenance costs for forklifts operating on even surfaces. The premium rubber compound provides excellent wear behavior and extreme resistance to cuts, chips and wear. The cushion layer ensures that toughness does not lead to compromises on operator's comfort and forklift's service life. Steel bead wires embedded in the hard base compound guarantees integrity by preventing the tire from rotating on the rim.

# TR-45 (F-3)

It is developed for front axles of 2WD industrial tractors and compact earthmovers for the purpose of usage in agricultural areas and worksites. Moreover, it is multi-purpose, low-profile tire that can be used on trailers for on or off road. It provides resistance and longevity against to tears and wears on hard soil, asphalt, and concrete with its specially formulated tread compound and reinforced carcass structure.

# SM-130 (R-4)

SM-130 is an R-4 pattern designed to provide ultimate traction and durability for compact loaders, backhoe loaders and telehandlers. Wide and deep lugs are purposefully located to maximize traction on challenging terrains and ensure maximum durability against cuts and damages. Guarantees consistent performance throughout the tire's long lifespan with wide tread profile that improves the tire's resistance against irregular wear. The number and angles of undertread plies are specifically determined to improve lateral stability.

# TR-60 (I-3)

TR-60 (I-3) tire designed for heavy duty tractor applications. Reinforced carcass structure provides exceptional durability and ensures longevity. Features excellent self-cleaning properties and outstanding grip in challenging off the road conditions. The tread pattern provides excellent stability during operations.

# Stx CD21 (E-2)

An industrial crane tire developed for mixed service (On/Off Road) usage. Designed to provide comfort on asphalt and superior traction in challenging construction site conditions. Offers outstanding traction and self-cleaning for off-road use, while ensuring a smooth ride on regular roads. It's durable enough for construction sites and delivers excellent traction and braking on any surface, extending its lifespan.

# SM-57 (L-3)

Offers reliable performance in difficult off road conditions. Its durable nylon carcass construction resistant against chips and chunks. Suitable to use earthmover applications. Massive cross lugs and wide ground contact provide excellent traction.

# SM-60 (L-3)

Delivers outstanding grip in construction sites thanks to its non-directional tread pattern design. The tread compound ensures excellent cut and chip resistance. Provides outstanding durability thanks to its solid tread center structure and strong nylon carcass.

CR: Cut Resistance

# SM-70 (L-3)

Delivers optimized performance on all terrains. The special compound and aggressive design of the tread pattern enhances handling throughout its exceptionally long life. Provides outstanding resistance to cuts and wears. Specifically designed to offer ultimate performance when excellent traction is needed.

## 2025 EDITION

At Starmaxx, we create AGR tires with one goal: To keep you moving forward, no matter the challenge. Our tires blend durable design with advanced technology, tailored to endure the diverse conditions of agriculture. They're built to last and perform, providing the stability and strength needed in agriculture.

For every season and field, Starmaxx AGR tires are the reliable choice for farmers who demand both quality and value. Trust in our tires to get the job done, day in and day out.
